PROJECT

College Management System   2023
- College management system manages student and faculty member data.
- Students can view their attendance, events and results and faculty can upload study material.
- We used HTML, CSS, JavaScript and bootstrap for Front-end. PHP and MySQL for Back-end. Apache server was used to host the database.
- I am working on front-end.

Finding Eligibility for Government Scheme-SSIP Hackathon   2023
- This project aims to provide an easy and single point access to information about welfare schemes of the Indian government, including eligible beneficiaries, type of benefits and scheme details.
- It helps students and people to find schemes related to their eligibility.
- We used HTML, CSS, JavaScript and bootstrap for Front-end.
- I am working on Front-end.
